As mentioned in the tools and materials list on the website, this project requires liquid watercolours. I purchased the Ecolines from Jacksons in Australia and they turned out to be my absolute favourites. They are expensive, but in my opinion, they are totally worth it. I also got really good results with the Sargent Art brand, especially the metallics. The little set of 6 Colour Splash liquid watercolours were probably my least favourite but I still managed to achieve some nice effects. There are more brands on the market but I had to limit myself so I can't offer any comment as to how they work. Considering all the liquid watercolours I purchased created similar results, I would suggest they should work the same.

Please also remember this product **MUST NOT BE SEALED WITH A WATER BASED SEALER**. I would highly recommend sealing with either Kato Liquid Clay or Resin.
